

## Award

---

CATTW member Judy Segal, professor of English (rhetoric) at the University of British Columbia, was chosen as one of the five members of the Faculty of Arts to win a Killam University Teaching Prize. Judy presented a paper at the CATTW conference in 1995.

## Call for Papers

---

*Computers and Composition: An International Journal for Teachers of Writing* invites submissions for a special issue on Technical Communication Studies. The guest editor for this special issue seeks original contributions employing a wide range of research methodologies, including rhetorical, theoretical, empirical, and historical. Papers should discuss computer-related pedagogical and programmatic issues of specific interest to technical communication teachers, program directors, and educators in workplace settings. Topics include, but are not limited to, the following broad areas: pedagogical and theoretical frameworks for teaching about and with computers in technical communication instruction contexts; innovative classroom practices and projects in technical communication, including their complications; technical communication curricula and course designs that balance practice and theory and/or production, literacy, and humanistic concerns; instructional issues and strategies relating to technical communication and computer networks, computer conferencing, electronic mail, the World Wide Web, hypertext, multimedia authoring, MUDs and MOOs, and distance learning. Deadline for 500-word proposals: June 15, 1996. This special issue will be guest edited by Stuart A. Selber, who encourages you to communicate with him about ideas, proposals, and drafts.
